## Questions?

**IF YOU HAVE A CRACK, STAR, CHIP OR BLISTER ON YOUR WINDSHIELD, WE CAN HELP!**

Keeping the Roads Safe One Windshield at a Time

No Cost Auto Glass Repair (NCAGR) is an independent Glass Company with a strong belief in the environment. We believe we can make a difference by using our business philosophy to help preserve the environment; **before it's too late!** The repairing of your windshield before it needs to be replaced will make a MAJOR impact on our planet. **So, let's get started!**

### FAQ'S

**Question:** What's the difference between my windshield and the other glass in my car? Isn't glass just glass?

**Answer:** No, there's a very important difference. Your windshield is made of LAMINATED SAFETY GLASS, which is 2 pieces of glass and a thin layer of vinyl.

**Question:** Is it really important that I fix my windshield if I have a crack, star, chip or blister in my windshield?

**Answer:** Yes! It's important for the following reasons:

- If the crack, star, chip or blister is small enough, it can be fixed without replacing the entire windshield.
- Repairing your windshield typically takes less than 15 minutes and is fully guaranteed.
- The repair to your windshield in most cases is **FREE** as insurance companies will waive the deductible.
- It provides you and your passengers with safety because your windshield is a structural element of your vehicle.
- You will also avoid optical impediments when driving, particularly at night, which is a significant safety hazard.
- You can receive a traffic citation for having a crack in your windshield.

**SO, PROTECT YOURSELF AND THE ENVIRONMENT, HAVE YOUR CRACKS, STARS, CHIPS OR BLISTERS FIXED TODAY.**
